**Warning/Avertissement**

SoundTube speakers must be installed by a professional audio installer/contractor. For safety and for optimum audio performance, installer must follow all directions issued by SoundTube Entertainment.

Les haut-parleurs SoundTube doivent être installés par un installateur audio professionnel ou un entrepreneur. Pour des raisons de sécurité et de performances audio optimales, l'installateur doit suivre toutes les instructions émises par SoundTube Entertainment.

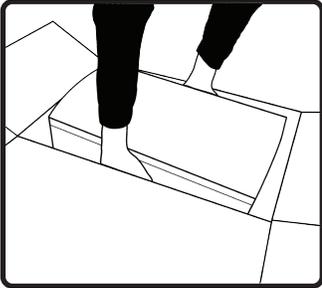

**Warning/Avertissement**

Do not spec or install speaker near support beam, ventilation duct or other structure that may interfere with speaker function or dispersion.

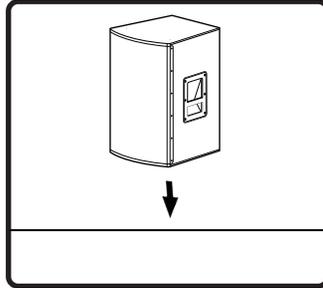

N'installez pas à proximité d'une poutre de support, d'un conduit de ventilation ou d'une autre structure susceptible d'interférer avec la fonction ou la dispersion des enceintes.

PSi Series

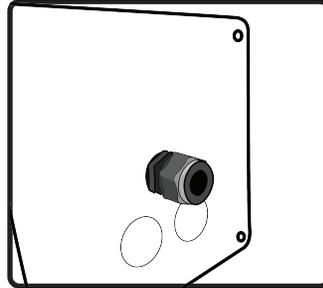

Install Instructions for:
PS1090i and PS1290i

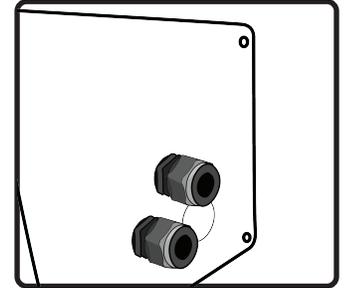

1. Unpack speaker.

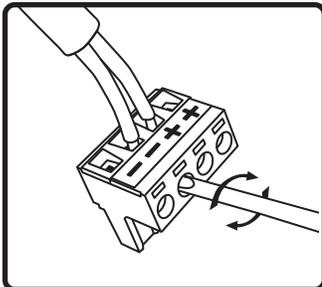

2. Place speaker on even surface.

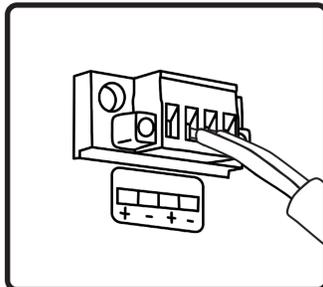

3. Install smaller M20 Cable Gland into included Cover Plate, then route signal wire through Cable Gland. Heavy-gauge wire (12-14 AWG jacketed, two-conductor) is recommended.

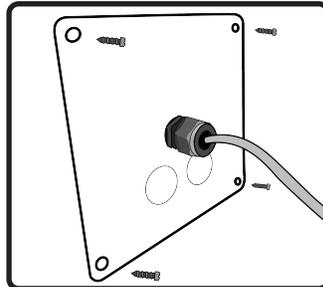

4. If a signal wire "out" is needed for daisy-chaining to the next speaker, install the included M25 Cable Gland into one of the available "knock-outs" on the cover plate.

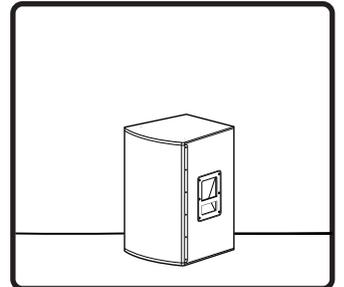

5. Connect signal wire to four-pin Euroblock plug via the 4-pin, 5.08 mm Euroblock.

6. Insert wired 4-pin Euroblock jack into speaker. Connectors are keyed for polarity.

7. Install Cover Plate using four supplied screws, then tighten down cable gland nut(s) securely around signal wire.

8. Done!
